

Existing radiator retained.

Need to consider fan extract route either through window or wall. Could vent to above through tower if in-line fan introduced within ducted route. Discounted venting through the west door - too impactful.

line of new below ground foul drains. assumed connection in highway on Church Road to be verified

Existing door retained with new insulated partition introduced on room side.

Fixed ladder access to above ceiling of new WC. Drop ladder access from there to tower stages via new hatch and ladder from tower first stage

Existing door and screen retained

Existing porch access arrangements retained with outer metal gates held open and temporary timber ramp to internal step.

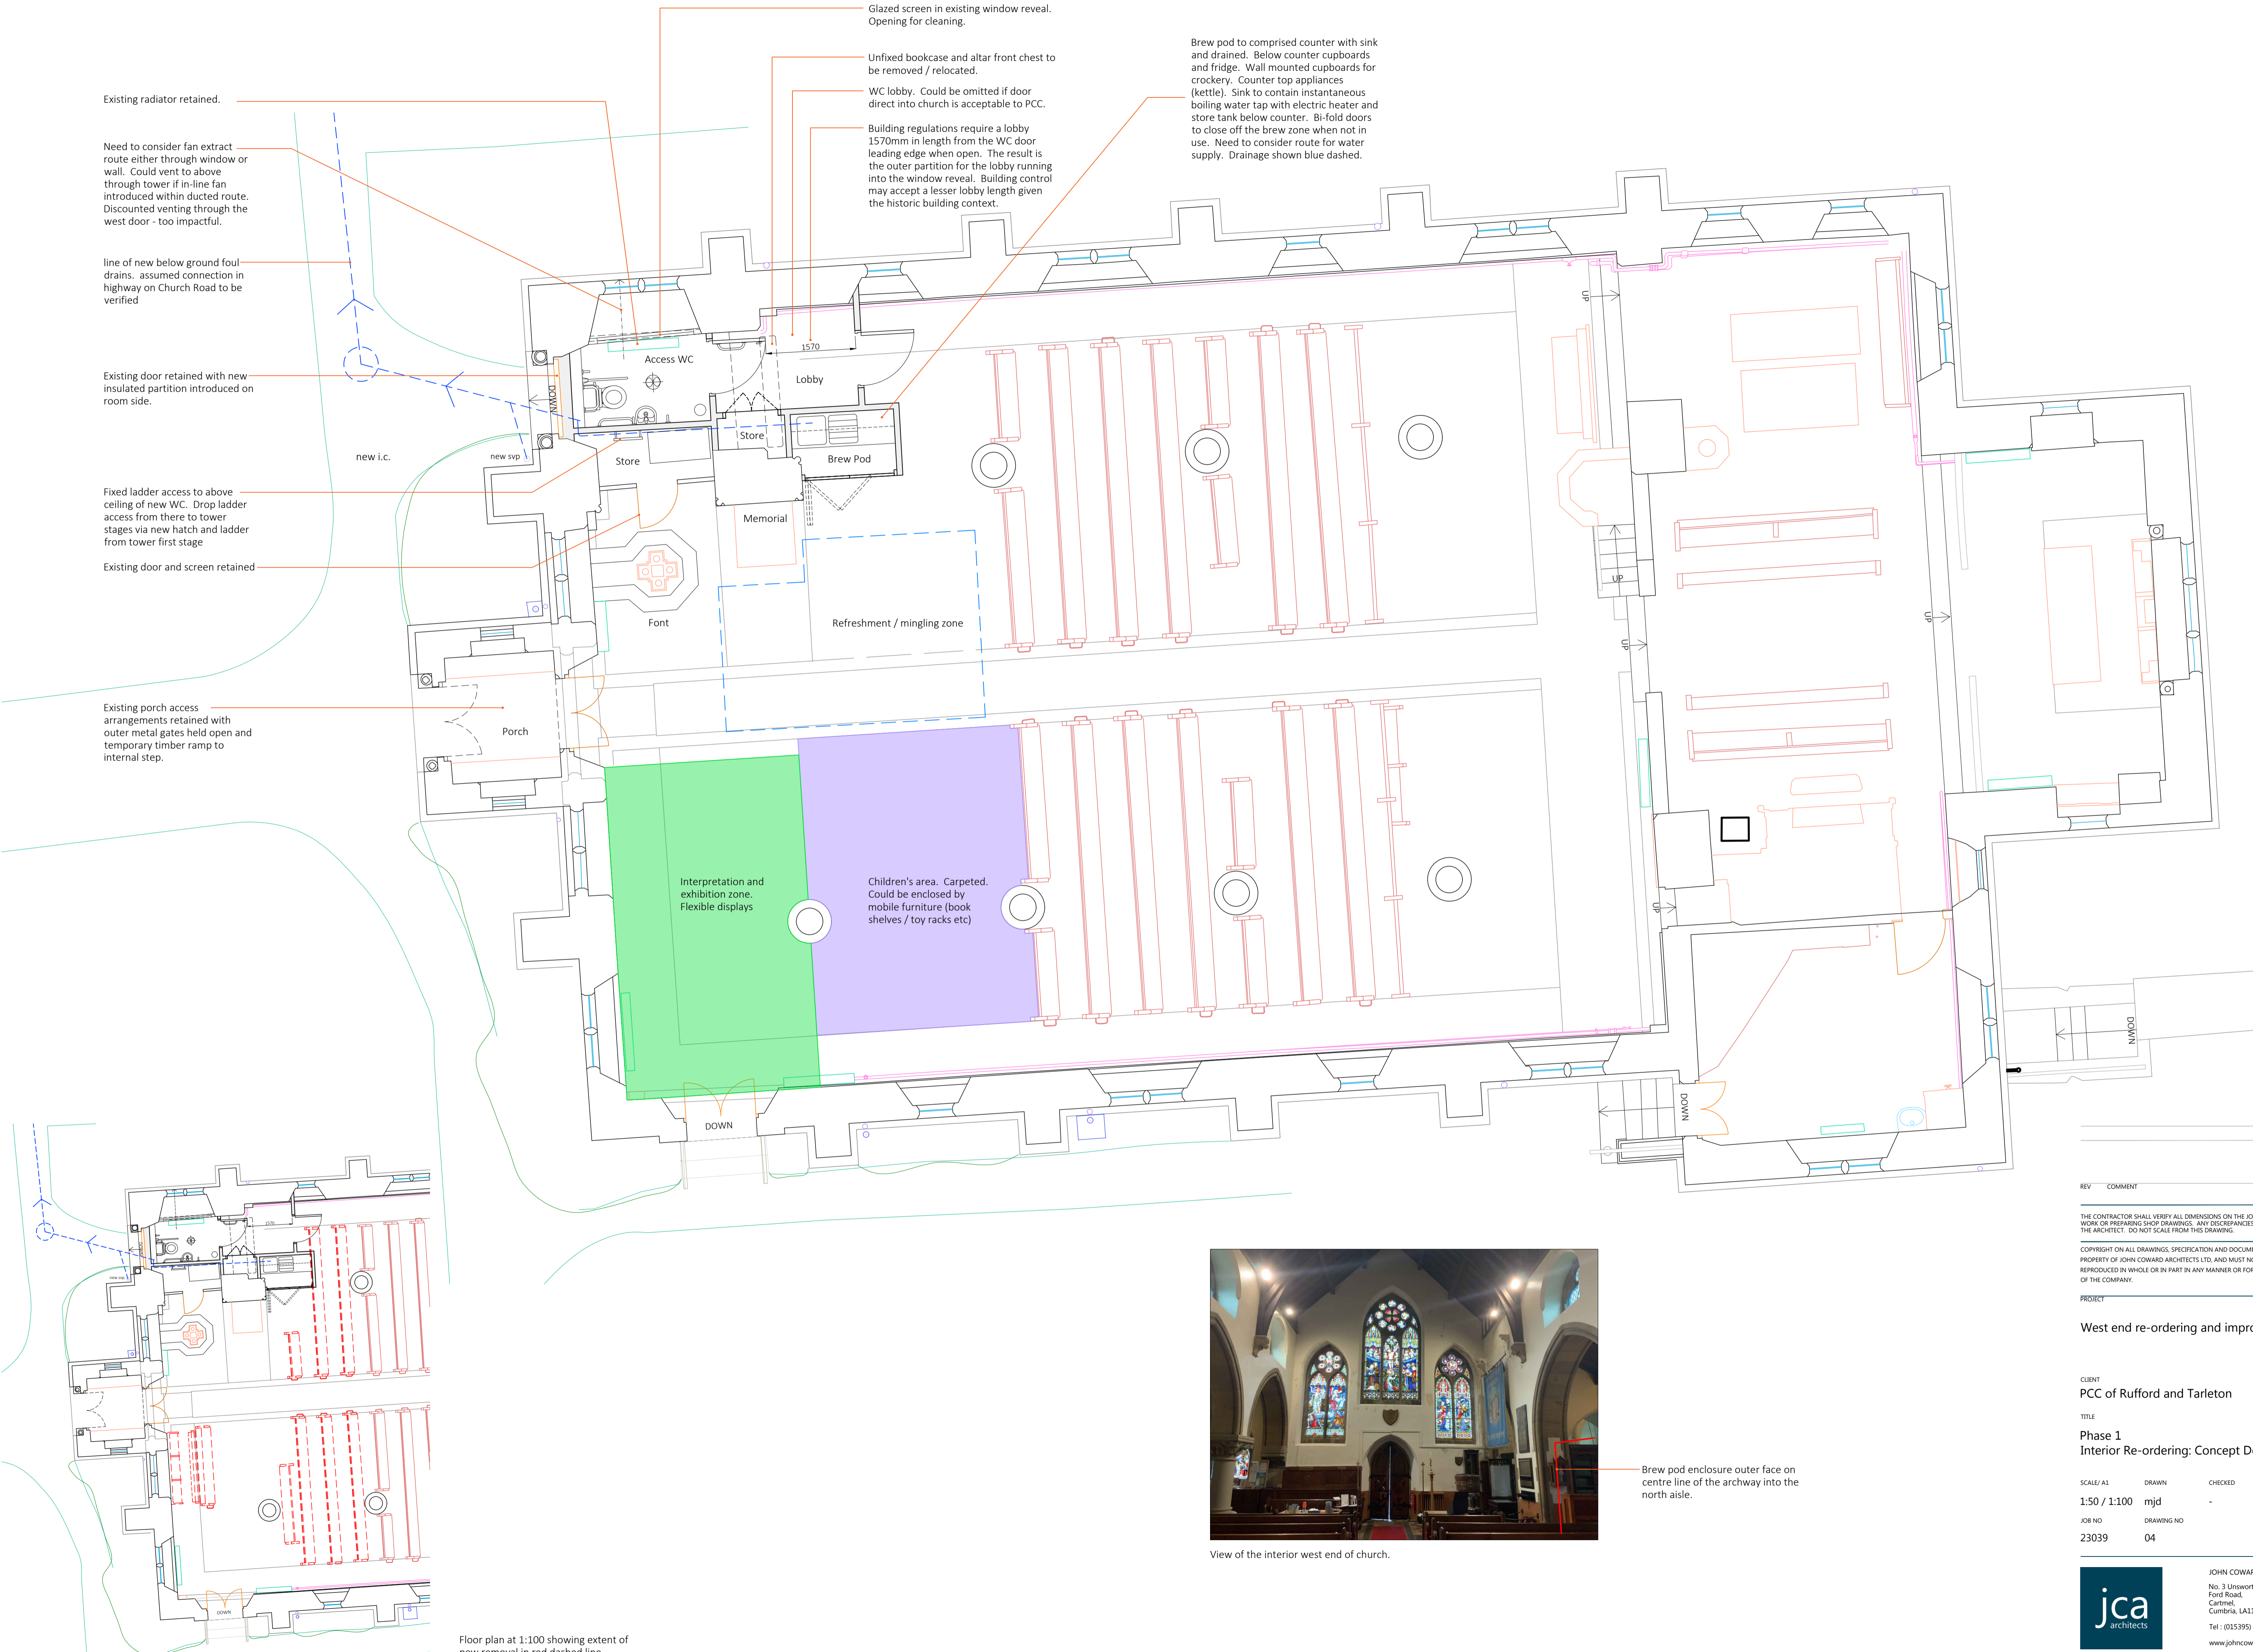

Glazed screen in existing window reveal. Opening for cleaning.

Unfixed bookcase and altar front chest to be removed / relocated.

WC lobby. Could be omitted if door direct into church is acceptable to PCC.

Building regulations require a lobby 1570mm in length from the WC door leading edge when open. The result is the outer partition for the lobby running into the window reveal. Building control may accept a lesser lobby length given the historic building context.

Brew pod to comprise counter with sink and drained. Below counter cupboards and fridge. Wall mounted cupboards for crockery. Counter top appliances (kettle). Sink to contain instantaneous boiling water tap with electric heater and store tank below counter. Bi-fold doors to close off the brew zone when not in use. Need to consider route for water supply. Drainage shown blue dashed.

Floor plan at 1:100 showing extent of pew removal in red dashed line.

View of the interior west end of church.

Brew pod enclosure outer face on centre line of the archway into the north aisle.
